

REFINED PRODUCTS

August 1, 2010

**Subject: Natural Sodium Sulfonate and Oxidized Petrolatum business transitions to Sonneborn.**

Dear Customer,

We are delighted to introduce Sonneborn as a global supplier of natural Sodium Sulfonates and Oxidized Petrolatum as the result of an acquisition of these two product lines from Chemtura, which closed on July 31, 2010.

Sonneborn has been producing these products on a contract manufacturing basis since our divestiture in 2005 from Crompton (who later became Chemtura). Our history in the products goes back to the early 20<sup>th</sup> century and we have been manufacturing these products in our Amsterdam facility since the 1960's. Sonneborn will service customers from both our Amsterdam and Petrolia, PA facilities to best fit our customer's logistical requirements.

This transition will not impact product quality, product characteristics, customer service, technical or sales support. We have prepared for a smooth transition of this business to Sonneborn as of August 1<sup>st</sup>.

For your perusal we are providing sales management contacts as per the summary below.
