SECTION 2 HAZARDS IDENTIFICATION

2.1. Classification of the substance or mixture

| Classification according to regulation (EC) No 1272/2008 [CLP][1] | Not Applicable |

2.2. Label elements

| CLP label elements | Not Applicable |

| SIGNAL WORD | NOT APPLICABLE |

2.3. Other hazards

REACH - Art.57-59: The mixture does not contain Substances of Very High Concern (SVHC) at the SDS print date.

SECTION 4 FIRST AID MEASURES

4.1. Description of first aid measures

| Eye Contact | If this product comes in contact with eyes: (WHEN MOLTEN ONLY)  
> Wash out immediately with water.  
> If irritation continues, seek medical attention.  
> Removal of contact lenses after an eye injury should only be undertaken by skilled personnel. |
|-------------|---------------------------------------------------|

| Skin Contact | If skin or hair contact occurs: (WHEN MOLTEN ONLY)  
> Flush skin and hair with running water (and soap if available).  
> Seek medical attention in event of irritation. |
|--------------|---------------------------------------------------|
Inhalation

- Other measures are usually unnecessary.

Ingestion

- WHEN MOLTEN ONLY: Immediately give a glass of water.
- First aid is not generally required. If in doubt, contact a Poisons Information Centre or a doctor.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11

4.3. Indication of any immediate medical attention and special treatment needed

Treat symptomatically

SECTION 5 FIREFIGHTING MEASURES

5.1. Extinguishing media

- Do NOT direct a solid stream of water or foam into burning molten material; this may cause spattering and spread the fire.
- Foam
- Dry chemical powder.
- BCF (where regulations permit).
- Carbon dioxide.
- Water spray or fog - Large fires only.

5.2. Special hazards arising from the substrate or mixture

Fire Incompatibility

- Avoid contamination with oxidising agents i.e. nitrates, oxidising acids, chlorine bleaches, pool chlorine etc. as ignition may result

5.3. Advice for firefighters

Fire Fighting

- Alert Fire Brigade and tell them location and nature of hazard.
- Wear breathing apparatus plus protective gloves.

SECTION 6 ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

See section 8

6.2. Environmental precautions

See section 12

6.3. Methods and material for containment and cleaning up

Minor Spills

- Clean up all spills immediately.
- Avoid contact with eyes.
- Wear safety glasses.

6.4. Reference to other sections

Personal Protective Equipment advice is contained in Section 8 of the SDS.

SECTION 7 HANDLING AND STORAGE

7.1. Precautions for safe handling

Safe handling

- The greatest potential for injury caused by molten materials occurs during purging of machinery (moulders, extruders etc.) It is essential that workers in the immediate area of the machinery wear eye and skin protection (such as full face, safety glasses, heat resistant gloves, overalls and safety boots) as protection from thermal burns.

Fire and explosion protection

See section 5

Other information

- Store in original containers.
- Keep containers securely sealed.

7.2. Conditions for safe storage, including any incompatibilities

<table>
<thead>
<tr>
<th>Suitable container</th>
<th>Lined metal can, lined metal pail/ can.</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Plastic pail.</td>
</tr>
<tr>
<td></td>
<td>Polyliner drum.</td>
</tr>
<tr>
<td></td>
<td>Packing as recommended by manufacturer.</td>
</tr>
<tr>
<td></td>
<td>Check all containers are clearly labelled and free from leaks.</td>
</tr>
</tbody>
</table>

Avoid contamination of water, foodstuffs, feed or seed.

**CARE:** Water in contact with heated material may cause foaming or a steam explosion with possible severe burns from wide scattering of hot material. Resultant overflow of containers may result in fire.

Avoid reaction with oxidising agents.

7.3. Specific end use(s)

See section 1.2

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1. Control parameters

**DERIVED NO EFFECT LEVEL (DNEL)**

Not Available

**PREDICTED NO EFFECT LEVEL (PNEC)**

**OCCUPATIONAL EXPOSURE LIMITS (OEL)**

8.2. Exposure controls

8.2.1. Appropriate engineering controls

**For molten materials:** Provide mechanical ventilation; in general such ventilation should be provided at compounding/converting areas and at fabricating/filling work stations where the material is heated. Local exhaust ventilation should be used over and in the vicinity of machinery involved in handling the molten material.

Keep dry!!

8.2.2. Personal protection

**Eye and face protection**

- For molten materials: Safety glasses with side shields
- For molten materials: Chemical goggles.

**Skin protection**

See Hand protection below

**Hands/feet protection**

For molten materials: Select gloves tested to a relevant standard (Europe EN 374, US F739, AS/NZS 2161.1 or national equivalent).

**Body protection**

See Other protection below

**Other protection**

When handling hot or molten liquids, wear trousers or overalls outside of boots, to avoid spills entering boots. Usually handled as molten liquid which requires worker thermal protection and increases hazard of vapour exposure.

**CAUTION:** Vapours may be irritating.

No special equipment needed when handling small quantities.

**Thermal hazards**

Not Available

Respiratory protection

8.2.3. Environmental exposure controls

See section 12

### SECTION 16 OTHER INFORMATION

**Full text Risk and Hazard codes**

**Other information**

Classification of the preparation and its individual components has drawn on official and authoritative sources as well as independent review by the Chemwatch Classification committee using available literature references.

A list of reference resources used to assist the committee may be found at: www.chemwatch.net

The (M)SDS is a Hazard Communication tool and should be used to assist in the Risk Assessment. Many factors determine whether the reported Hazards are Risks in the workplace or other settings. Risks may be determined by reference to Exposures Scenarios. Scale of use, frequency of use and current or available engineering controls must be considered.

For detailed advice on Personal Protective Equipment, refer to the following EU CEN Standards:

- EN 166 Personal eye-protection
- EN 340 Protective clothing
- EN 374 Protective gloves against chemicals and micro-organisms
- EN 13832 Footwear protecting against chemicals
- EN 133 Respiratory protective devices
