4. FIRST AID MEASURES

Swallowing
Do not induce vomiting. Obtain medical attention immediately. This is not a toxic substance.

**Inhalation**
Obtain medical attention. Oxygen may be given by qualified personnel if breathing is difficult or cyanosis (blue discoloration of skin) is noted. Give artificial respiration if not breathing. Remove to fresh air if aerosol spray is inhaled. Aspiration may cause pulmonary edema or aspiration pneumonia. Exposed persons should be kept under medical observation for at least 48 hours because delayed effects may occur.

**Skin**
No emergency care anticipated. Wash skin with soap and water.

**Eye contact**
Flush eyes thoroughly with water for several minutes. Obtain medical attention if discomfort persists.

**Extinguishing media**
Suitable: Treat as an oil fire.
- dry chemical
- carbon dioxide (in case of small fires)
- water fog
- foam
- sand or earth

Unsuitable: Do not use water jet. Oil will float on water and can spread any fire.

**Special fire fighting procedures**
Do not direct a solid stream of water or foam into burning material; this may cause spattering and spread the fire. If a rail or tank truck is involved in a fire, ISOLATE for 800 meters (0.5 mile) in all directions. Shut off fuel to fire if it is possible to do so without hazard. If this is impossible, withdraw from the area and let the fire burn out under controlled conditions. Withdraw immediately in case of rising sound from venting safety device or any discoloration of tank due to fire.

**Special protective equipment for firefighters**
Self-contained breathing apparatus.

**Unusual fire and explosion hazards**
This product will float upon water, so water spray is not a suitable extinguishing agent as it may cause any fire to spread.

---

**6. ACCIDENTAL RELEASE MEASURES**

**Personal precautions**
Wear suitable protective equipment. Eliminate sources of ignition.

**Environmental precautions**
Avoid runoff to sewers or waterways. Dike area of spill to prevent spreading and pump liquid to salvage tank. Waste: avoid washing into watercourses. Use methods consistent with local regulations or incinerate.

**Methods for cleaning up**
Dike to contain spill. Absorb on inert material such as sand, earth, vermiculite. Stop the leak if it can be done without risk. Floor may be slippery; use care to avoid falling.

### 7. HANDLING AND STORAGE

**HANDLING**
Do not handle at temperatures >+40°C, unless wearing appropriate protective equipment.

**Ventilation**
General (mechanical) room ventilation is expected to be satisfactory for use at room temperature.

**STORAGE**
**Storage requirements**
Keep away from heat, sparks and flame. Do not store at temperatures: >+40°C without proper safety review of storage equipment. Store protected from light.
